%607 reach	%209 reach	%351 visits	%549 visits	%168 likes	%278 likes

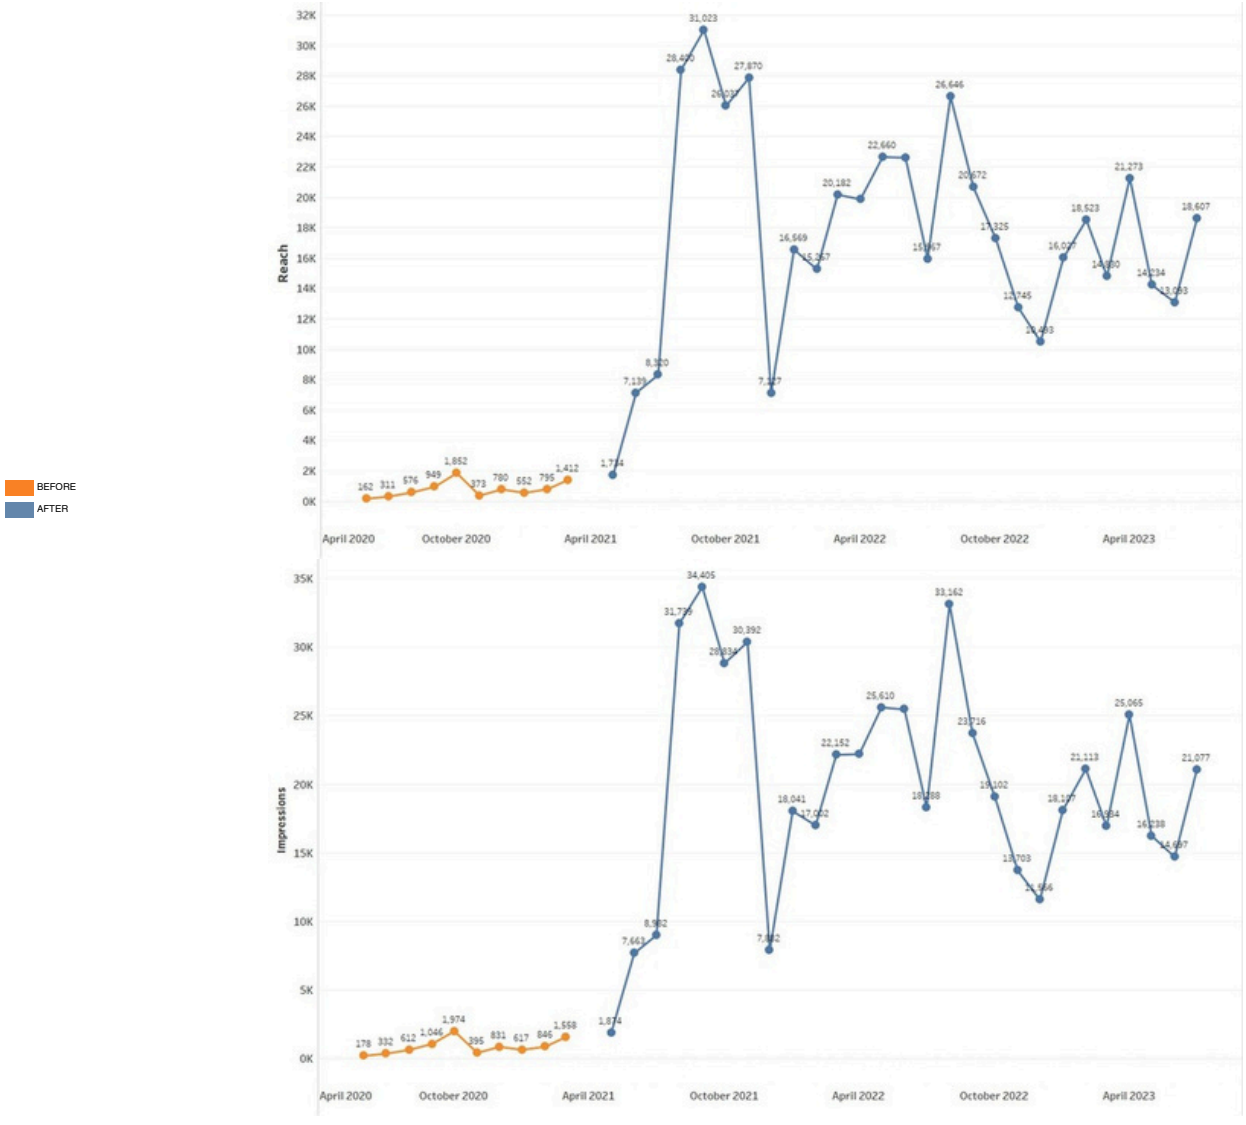

Our collaboration commenced on May 6th, 2021, coinciding with the post-pandemic phase, and after a brief pause in December of the same year. During this period, we observed a substantial surge in organic reach and engagement across all our social media platforms, despite the notable changes in the Instagram algorithm that favored sponsored and personal account posts.

It is crucial to mention that, in accordance with management directives, no promotional activities were undertaken during this period, with the exception of a single giveaway event in August 2021. The statistical data consistently indicates higher performance metrics during the spring and summer months. Notably, the giveaway promotion in August 2021 yielded a remarkable spike in link clicks, highlighting the significance of promotional content in driving user engagement and interaction.
